a throttle opening amount detecting unit for detecting a throttle opening amount,

a second control unit for computing a second clutch torque of the clutch unit based on the throttle opening amount,

a tire diameter difference computing unit for computing a diameter difference of a tire,
and

a final clutch torque computing unit for computing a final clutch torque wherein the final clutch torque computing unit computes the final clutch torque by a computation involving the first clutch torque, the second clutch torque, and at least one tire diameter difference ration coefficient”.

This statement is not intended to necessarily state all the reasons for allowance or all the details why the claims are allowed and has not been written to specifically or impliedly state that all the reasons for allowance are set forth (MPEP 1302.14).
